

# TECHNICAL INFORMATION

## R401

**SAFEFLOOR**

### SPECIAL FEATURES

- ✓ Aging-resistant
- ✓ Suitable for grass heating systems
- ✓ High adhesion
- ✓ Easy to apply
- ✓ Not sensitive to frost
- ✓ Heat- and cold-resistant

### REQUIRED QUANTITIES PER RM

- ✓ Approx. 200–280 g  
per meter

### OPEN TIME

- ✓ Approx. 45 min.  
at 20 °C

### ACCESSIBILITY

- ✓ After 24–48 hours

### ROOM CLIMATE AT WORK SITE

- ✓ > 0°C

### SHELF LIFE

- ✓ 9 months

### AVAILABLE PACKAGING

- ✓ 15 kg plastic bucket

### GISCODE

- ✓ RU1 solvent-free

### COLOUR

- ✓ Green

# ALL-WEATHER PRO

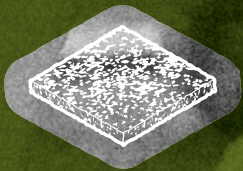

**INNOVATION** Whether for tropical climates or light frost: The new wet adhesive R 401 is particularly suitable for bonding artificial turf when it is raining or at cool temperatures.

# REVOLUTIONARY WET ADHESION

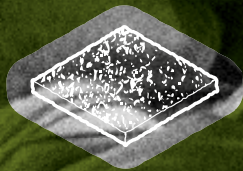

**EXTREME WEATHER CONDITIONS** Strong sun and summer temperatures, heavy rain or frost: With the R 401, the weather will certainly not play havoc with your plans.

The 1-component R 401 is ready for immediate use. In addition, the hardening of the solvent-free PU adhesive can be accelerated by moistening the adhesive corrugations.

## SUITABLE SUBFLOORS

Fine grit

PU rubber granulated material

- Very economical
- Accelerated hardening at high humidity
- Ideal foaming resulting in extremely good wetting
- Bonding is possible even in extreme climatic conditions

- Highly resilient
- Aging-resistant
- Not sensitive to frost
- Extremely elastic
- Non absorbent
- Waterproof
- Heat and cold-resistant
